### Colin Mayne: Sr. Architecture Consultant

Colin Mayne is an accomplished senior architecture consultant who joined Taos in March 2009. He leverages over 25 years of experience in the technology industry across multiple disciplines, including systems management, enterprise architecture, applications architecture, data warehousing, business intelligence, business continuity, facilities management, data center management/design, infrastructure management/design, configuration management, CMDB, database management and systems solution design/automation. In addition to his wide breadth of experience, Colin has maintained a high degree of success within vastly different environments across the world.

While on engagement with Taos, Colin has contributed his expertise at Barclays Global Investors and PG&E. At PG&E, he is an architect on the Smart Meter project and works in collaboration with PG&E's partners at Silver Spring Networks. At Barclays Global, Colin has participated in an assessment of their storage environment.

Colin's recent roles, prior to Taos, included working at JP Morgan Chase as Senior Director of Infrastructure where he implemented sound systems management monitoring services across the Global Storage, UNIX and Windows 44K servers (approximately). Also at JP Morgan Chase/Bank One, Colin acted as the ICTO of Retail Infrastructure Architecture/Strategy. In this role, he defined and managed infrastructure standards for retail and sub lines of business. His technical prowess and ability to balance the needs of the business have enabled him to achieve a high degree of success for his clients.
