State and Local Government IT Managers Have High Hopes for the Cloud
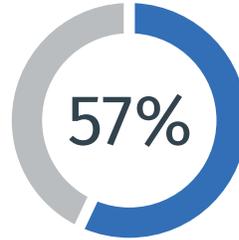

The State and Local Cybersecurity Improvement Act will fund $1 billion in grants for state, local, tribal, and territorial governments between 2022-2026[1]

Over 30% of governments will use engagement metrics to track quantity and quality of citizen participation in policy and budget decisions by 2024[2]

Cloud solutions are full of potential

79% of state and local government IT managers agree hybrid cloud is the ideal operations system for a resilient government. These managers consider improved data availability and interoperability, flexibility and agility, and cybersecurity to be the primary benefits of cloud adoption.[3]

57% of state and local IT managers feel their organization is not getting the most out of its hybrid cloud investments[4]

Hopes are as high as budgets are lean

Cybersecurity is a moving target as attack methods evolve and the threat landscape changes
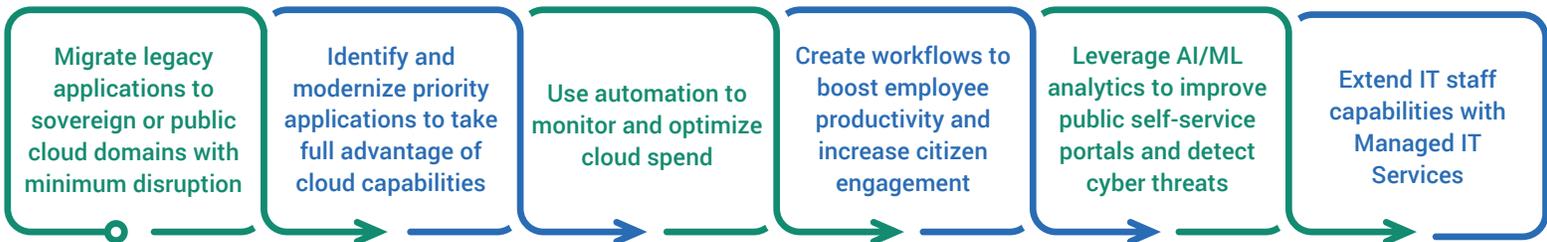

Managing and securing data across environments is challenging

IT staffing shortages and cloud expertise are affecting plans

Accelerate digital transformation with help from Taos

Taos helps state and local government agencies automate processes and modernize legacy applications by capitalizing on scalability, enhanced security and cloud economics. Taos offers Advisory Services, Professional Services, Managed IT and Security Services to help you:

- Migrate legacy applications to sovereign or public cloud domains with minimum disruption
- Identify and modernize priority applications to take full advantage of cloud capabilities
- Use automation to monitor and optimize cloud spend
- Create workflows to boost employee productivity and increase citizen engagement
- Leverage AI/ML analytics to improve public self-service portals and detect cyber threats
- Extend IT staff capabilities with Managed IT Services

Taos works with you to develop a unique, secure solution that best fits your agency's needs and optimizes your ROI. We follow a proven methodology and architecture to ensure you get the most benefit from your cloud experience.
