

Taos Cloud Cost Optimization Advisory

Reduce Costs and Gain Control of your Cloud Spend

The rapid adoption of cloud has left many enterprises dealing with uncontrolled spending due to insufficient governance, tooling or FinOps practices. Organizations without the right talent and expertise can struggle to identify areas of savings in their cloud deployment.

Customer Challenges

Costly and unpredictable cloud spend

Lack of visibility and comprehensive oversight

The difficulty of cohesive reporting on multi-cloud environments

Growing cloud sprawl with limited governance

Wasted spend due to mid-sized instances

Lack of relevant skillset and expertise

Taos' **Cloud Cost Optimization Advisory** is a strategic consultative service focused on lowering your existing public cloud spend by examining cloud deployment, processes, organization and governance to identify areas of improvement to drive ongoing cost savings. This 4–5-week engagement evaluates:

Organizational framework analysis - Cloud governance analysis - Operational procedures - Cost optimization analysis - Tooling analysis

It results in a set of prescriptive, strategic recommendations to control ongoing cloud costs with actionable steps to optimize cloud spend patterns and prevent budget overruns.

Customer Benefits

Strategic assessment that can help cut cloud bills by up to 30%

Optimizes recurring costs and provides stronger predictability

Improved reporting for better insights

Reduce costs and gain control of your cloud spend

Realized savings can be re-invested in other business initiatives
