

SOLUTION BRIEF

Accelerate Workload Migration to Google Cloud with Taos

taos
an IBM Company

Google Cloud
Premier Partner

Cloud migration is a strategic business initiative that must succeed for the business to survive. However, often teams lack the skilled cloud resources or bandwidth to navigate the complexities in architecting, designing, and securing cloud infrastructure.

Key to successfully migrating your workloads to the cloud is to build a robust, secure, and scalable foundation. As a

management and infrastructure layer, the Cloud Foundation is critical as it influences the security and stability of the workloads that will eventually run in the cloud environment.

Expertise in automated management and migration tools are also critical to executing a smooth migration. In addition to accelerating the migration, the expertise, tools and processes deliver, predictable, consistent, and repeatable outcomes.

Taos GCP Migration Accelerator

Taos GCP Migration Accelerator service offering simplifies and accelerates your cloud migration efforts leveraging proven methodologies and Google Cloud best practices.

Taos will help identify your first mover workload balancing complexity, risk, and value. The GCP Accelerator service delivers a foundation that is fit for purpose and a production ready workload migration and automated landing zone. This coupled with an experienced team and assets executes your first workload and accelerates additional migrations.

Speed

See rapid results. Avoid the start and stall cycle of cloud migrations by leveraging our expertise and proven methodology to deliver predictable migrations.

Proven Methodology and tools

Taos provides the expertise, tools, and proven processes to avoid common pitfalls of cloud workload migrations. Leveraging Google Cloud best practices, Taos delivers a fit for purpose foundation.

Precision and Predictability

Leveraging in-depth design and deployment expertise we remove blockers. Taos utilizes IaC provisioning process and prescriptive approach based on proven blueprint architecture frameworks.

Google Collaboration

A Google Premier Partner since 2014. We work with Google Cloud to ensure delivery and project teams' efforts provide the best solutions and support for customer success.

Key Elements of Taos GCP Migration Accelerator

A dedicated pod of experienced cloud architects and GCP resources

Design and deploy Cloud foundation aligned to customer's workload(s) and future state vision

Deliver an automated build /rebuild Landing Zone using Infrastructure as Code (IaC) provisioning

Identify and move first application workload with precision and predictability

Provide a future workload Migration Roadmap

Systematic hand-off of production ready application workload to client operations team

Proven Taos Navigator Methodology

Taos utilizes our proven 5 phase Navigator Methodology Framework, coupled within extensive automated software tooling and IaC, to deliver workspace migration based on proven GCP Cloud Foundation within weeks. Simplify migrations with an enterprise solution that quickly delivers production ready workload migration and an automated landing zone.

Why Partner with Taos?

With 30 years of experience helping enterprises adopt new technologies, thousands of customers choose Taos for their migration journeys to navigate pitfalls during implementation and deployment. Taos' offers full complement of Google Cloud Platform Migration Services to accelerate, automate and execute transformation of workloads.

Taos offers advanced services, including DevOps and modernization, that help organizations optimize their journey and their cloud operations.
